Press Release, dated August 19, 2015.

**Popeyes Louisiana Kitchen, Inc. Reports Results for Second Quarter 2015;
Increases Fiscal Year 2015 Same-Store Sales and EPS Guidance**

ATLANTA—August 19, 2015—Popeyes Louisiana Kitchen, Inc. (NASDAQ: PLKI), the franchisor and operator of Popeyes® restaurants, today reported results for its fiscal second quarter of 2015, which ended July 12, 2015. The Company also announced increased same-store sales and earnings guidance for fiscal 2015.

“Popeyes robust second quarter results demonstrate our focused execution against the five pillars of our strategic roadmap. The sustainability of our impressive performance is a reflection of the collaborative relationship with our franchisees, innovative product pipeline and emphasis on developing leadership capabilities. Looking forward, we believe there is a long runway for continued growth of Popeyes, both in the U.S. and around the globe,” commented Cheryl Bachelder, Popeyes Chief Executive Officer.

Second Quarter Highlights:

We accomplished the following results in the second quarter 2015, principally as a result of continued disciplined execution against our business strategies:

- Reported net income was \$10.3 million, or \$0.44 per diluted share, compared to \$8.3 million, or \$0.35 per diluted share in the second quarter 2014. Adjusted earnings per diluted share were \$0.44, compared to \$0.39 in 2014, representing an increase of 12.8%.
- Global same-store sales increased 7.5% in 2015 compared to a 3.6% increase in 2014 for a two-year compounded growth rate of 11.4%. This positive sales growth reflects Popeyes’ continued menu innovation, supported by expanded compelling advertising and strengthened restaurant execution.
- Total domestic same-store sales increased 7.9%, compared to a 3.8% increase last year, for a two-year compounded growth rate of 12.0%. Popeyes’ domestic same-store sales have outpaced the chicken-QSR segment for 29 consecutive quarters and overall QSR for 15 consecutive quarters, according to independent data. Popeyes has increased its domestic market share of the chicken-QSR category to 25.4% compared to 23.1% last year.
- International same-store sales increased 4.3%, compared to 2.2% last year, for a two year compounded growth rate of 6.6%.
- The Popeyes system opened 37 restaurants, which included 18 domestic and 19 international restaurants, compared to 36 total openings in the same period last year. Net restaurant openings were 31, compared to 21 net restaurant openings in the same period last year.
- As of the end of the second quarter in 2015, the Company operated and franchised 2,443 restaurants, compared to 2,262 at the end of the second quarter in 2014, representing net unit growth of 8.0% over the last twelve months.
- Total system-wide sales increased by 13.6% in the second quarter 2015 as a result of same store sales performance and net unit growth of the system.
- Total revenues increased approximately 10.6% to \$59.4 million in 2015 from \$53.7 million in the prior year. The \$5.7 increase in revenues was primarily due to a \$2.8 million increase in sales by Company-operated restaurants and a \$3.5 million increase in franchise royalties. Sales by company-operated restaurants and franchise royalties were driven by positive same store sales increases and net unit growth.
- Company-operated restaurant operating profit was \$4.9 million, or 19.5% of sales, compared to \$4.2 million, or 18.8% of sales in 2014. The improvement in Company-operated restaurant operating profit margin was primarily attributable to improved labor controls. Higher poultry and grocery basket costs were offset by targeted price increases and improved management of food, beverages and packaging.
- Through the first 28 weeks of fiscal 2015, Operating EBITDA was \$45.6 million, or 32.8% of total revenue, compared to \$38.9 million, or 31.4% of total revenue, last year, a 17% increase.
- Through the first 28 weeks of fiscal 2015, free cash flow was \$31.3 million, compared to \$24.2 million in 2014.
- The Company repurchased 260,207 shares of its common stock for approximately \$15.0 million in the second quarter.

- During the first quarter of 2015, Popeyes domestic freestanding franchised restaurants recorded average restaurant operating profit margins before rent of 23.5% compared to 23.4% during the first quarter of 2014.

Fiscal 2015 Guidance

Based on performance through the second quarter, the Company is making the following changes to our guidance for full-year fiscal 2015:

- Same-store sales growth in the range of 4.5% to 5.5%, an increase from previous guidance at the upper end of the range of 3.5% to 4.5%.
- Adjusted earnings per diluted share in the range of \$1.85 to \$1.90, compared to previous guidance of \$1.84 to \$1.89.
- Share repurchases of approximately \$50 to \$60 million, compared to previous guidance of \$40 to \$50 million.

In addition, the Company reiterates the following guidance for full year fiscal 2015:

- New restaurant openings of 200 to 225, including approximately 85 to 95 internationally. Net restaurant openings are expected to be in the range of 115 to 150, for a system growth rate of approximately 5%. During 2015, the Company expects to open 3 to 5 new Company-operated restaurants.
- General and administrative expenses at approximately 2.9% of system-wide sales.
- Capital expenditures for the year of \$15 to \$20 million, including approximately \$12.5 million for Company-operated restaurant development and relocation.
- An effective income tax rate of approximately 38%.

Conference Call

The Company will host a conference call and internet webcast with the investment community at 9:00 A.M. Eastern Time on August 20, 2015, to review the results of the second quarter 2015. To access the Company's webcast, go to www.plki.com, select "Investor Information" and then select "Popeyes Louisiana Kitchen, Inc. Second Quarter 2015 Earnings Conference Call." Management's Use of Non-GAAP Financial Measures

Adjusted earnings per diluted share, operating EBITDA, Company-operated restaurant operating profit, free cash flow and consolidated total leverage ratio are supplemental non-GAAP financial measures. The Company uses adjusted earnings per diluted share, operating EBITDA, Company-operated restaurant operating profit, free cash flow and consolidated total leverage ratio, in addition to net income, operating profit and cash flows from operating activities to assess its performance and believes it is important for investors to be able to evaluate the Company using the same measures used by management. The Company believes these measures are important indicators of its operational strength and the performance of its business. Adjusted earnings per diluted share, operating EBITDA, Company-operated restaurant operating profit, free cash flow and consolidated total leverage ratio as calculated by the Company are not necessarily comparable to similarly titled measures reported by other companies. In addition, adjusted earnings per diluted share, operating EBITDA, Company-operated restaurant operating profit, free cash flow and consolidated total leverage ratio: (a) do not represent net income, cash flows from operations or earnings per share as defined by GAAP; (b) are not necessarily indicative of cash available to fund cash flow needs; and (c) should not be considered as an alternative to net income, earnings per share, operating profit, cash flows from operating activities or other financial information determined under GAAP.

Adjusted earnings per diluted share: Calculation and Definition

The Company defines adjusted earnings for the periods presented as the Company's reported net income after adjusting for certain non-operating items consisting of the following:

- i. other expense (income), net, which included \$0.1 million net gain of sale of assets for the twelve weeks ended July 12, 2015 and \$0.2 million net gain on sales of assets and \$0.1 million net loss on disposals of fixed assets for the 28 weeks ended July 12, 2015 and July 13, 2014 respectively,
- ii. \$0.2 million and \$0.4 million in executive transition expenses in the twelve and twenty-eight weeks ended July 12, 2015 respectively and \$1.4 million for the twelve and twenty-eight weeks ended July 13, 2014,
- iii. other income of \$0.4 million for recoveries under the Deepwater Horizon Economical and Property Damages Settlement Program for the twelve and twenty-eight weeks ended July 12, 2015, and
- iv. the tax effect of these adjustments at the effective statutory rates.

Adjusted earnings per diluted share provides the per share effect of adjusted net income on a diluted basis. The following table reconciles on a historical basis for the twelve week periods ended July 12, 2015 and July 13, 2014, respectively, the Company's adjusted earnings per diluted share on a consolidated basis to the line on its condensed consolidated statement of operations entitled net income, which the Company believes is the most directly comparable GAAP measure.

Company-operated restaurant operating profit margin	19.5%	18.8%	20.7%	19.7%

Free cash flow: Calculation and Definition

The Company defines free cash flow as net income plus depreciation and amortization plus stock-based compensation expense, minus maintenance capital expenditures which includes: for the twenty-eight weeks ended July 12, 2015, \$0.6 million of information technology and other corporate assets, and \$0.4 million in other capital assets to maintain, replace and extend the lives of Company-operated restaurant facilities and equipment; and for the twenty-eight weeks ended July 13, 2014, \$0.6 million in Company-operated restaurant reimagining, \$1.4 million of information technology and other corporate assets, and \$0.7 million in other capital assets to maintain, replace and extend the lives of Company-operated restaurant facilities.

The following table reconciles on a historical basis for the twenty-eight week periods ended July 12, 2015 and July 13, 2014, respectively, the Company's free cash flow on a consolidated basis to the line on its consolidated statements of operations entitled net income, which the Company believes is the most directly comparable GAAP measure.

Free cash flow	\$ 31.3	\$ 24.2

Consolidated Total Leverage Ratio: Calculation and Definition

The Company uses Consolidated Total Leverage Ratio (“total leverage ratio”) to measure compliance with its covenants and borrowing capacity under its 2013 Credit Facility. The Company also believes that its total leverage ratio is a helpful measure for investors to assess its overall debt leverage which affects its ability to refinance its long-term debt as it matures, the cost of existing debt, the capacity to incur additional debt to invest in its strategic initiatives, and the ability to repurchase and retire its common shares.

The Company calculates Consolidated Total Leverage Ratio, in accordance with its 2013 Credit Facility, as the ratio of Consolidated Total Indebtedness divided by Consolidated EBITDA. Consolidated Total Indebtedness is generally defined under the 2013 Credit Facility as total indebtedness reflected on our balance sheet plus outstanding letters of credit. Consolidated EBITDA is defined in the 2013 Credit Facility as earnings before interest expense, taxes, depreciation and amortization, other expenses (income), net, and stock-based compensation expense for the four immediately preceding fiscal quarters.

Set forth below is the calculation of Consolidated Total Leverage Ratio as of July 12, 2015 and December 28, 2014 and the reconciliations of Consolidated Total Indebtedness and Consolidated EBITDA to their most comparable GAAP measures: current debt maturities and long-term debt, for Consolidated Indebtedness, and net income, for Consolidated EBITDA.
