Effective January 1, 2019, we adopted the new lease accounting standard ("New Standard"). Our consolidated financial statements for 2019 reflect the application of the New Standard, while our consolidated financial statements for 2018 were prepared under the guidance of the previously applicable lease accounting standard ("Previous Standard").

The most significant changes of this adoption that affect comparability of our results of operations between 2019 and 2018 are summarized as follows:

- Under the Previous Standard, we did not reflect reimbursements of property tax and maintenance costs from lessees and sublessees or related costs in our Consolidated Statement of Operations or segment results. Under the New Standard, property tax and maintenance costs and related reimbursements from lessees and sublessees are reported on a gross basis in our Consolidated Statement of Operations and segment results. Although there is no net impact to Net Income Attributable to Common Shareholders and Noncontrolling Interests or Adjusted EBITDA from this change, the presentation resulted in a total increase of \$34 million in franchise and property revenues and franchise and property expenses.
- Additionally, the New Standard requires the reclassification of favorable lease assets and unfavorable lease liabilities to the right-of-use asset recorded for the underlying lease. As a result, the amortization period for certain lease assets and liabilities was reduced, resulting in a year-over-year increase of approximately \$2 million in non-cash amortization in the three months ended March 31, and expect a full year increase of approximately \$10 million in 2019 compared to 2018. Amortization of favorable and unfavorable leases is classified as depreciation and amortization and is excluded from segment income. This impact is expected to decrease significantly over the following few years as leases tied to the increased amortization are renewed or expire. The estimated impact is based on our existing lease portfolio as of December 31, 2018.

The implementation of the New Standard also impacted our Consolidated Balance Sheets, the most significant of which was the recognition of approximately \$1.1 billion of operating lease liabilities and related right-of-use assets on January 1, 2019. Additionally, "capital leases" have been renamed as "finance leases" under the New Standard, with no material changes in accounting.

The year-over-year change in Total Revenues on a GAAP basis was primarily driven by FX movements. On an organic basis, the year-over-year change in Total Revenues was primarily driven by system-wide sales growth.

The decrease in Net Income Attributable to Common Shareholders and Noncontrolling Interests for the first quarter was primarily driven by an increase in income tax expense resulting from a reduced tax benefit of equity based compensation as compared to the prior year.

The year-over-year change in Adjusted EBITDA on an organic basis was primarily driven by system-wide sales growth, partially offset by timing of advertising revenues and expenses.

(3) TH Adjusted EBITDA includes \$3 million of cash distributions received from equity method investments for the three months ended March 31, 2019 and 2018.

For the first quarter of 2019, system-wide sales growth was primarily driven by net restaurant growth of 1.9%. Comparable sales were (0.6)%, including Canada comparable sales of (0.4)%.

The year-over-year change in GAAP Total Revenues was primarily driven by FX movements. On an organic basis, the year-over-year change in Total Revenues was primarily driven by a decrease in company restaurant revenues (VIE deconsolidation and refranchisings), partially offset by system-wide sales growth.

The year-over-year change in Adjusted EBITDA was primarily driven by FX movements, however, on an organic basis Adjusted EBITDA was primarily driven by system-wide sales growth, partially offset by timing of advertising revenues and expenses.

## Forward-Looking Statements

This press release contains certain forward-looking statements and information, which reflect management's current beliefs and expectations regarding future events and operating performance and speak only as of the date hereof. These forward-looking statements are not guarantees of future performance and involve a number of risks and uncertainties. These forward-looking statements include statements about our expectations regarding our comparable sales performance; our expectations and belief regarding the long-term growth prospects for our brands; our expectations regarding our strategic initiatives, product pipeline, and the timing and geography of new product launches; our expectations regarding our restaurant pipeline and growth prospects in key markets; our estimates regarding the impact of changes in accounting and our transition to the New Standard; and our expectations regarding the timing of capital expenditures. The factors that could cause actual results to differ materially from RBI's expectations are detailed in filings of RBI with the Securities and Exchange Commission and applicable Canadian securities regulatory authorities, such as its annual and quarterly reports and current reports on Form 8-K, and include the following: risks related to RBI's ability to successfully implement its domestic and international growth strategy and risks related to its international operations; risks related to RBI's ability to compete domestically and internationally in an intensely competitive industry; and changes in applicable tax laws or interpretations thereof. With respect to our comparable sales performance, our month to date results may not be indicative of our full quarter results based on factors within and outside of our control, including those factors set forth or referred to above. Other than as required under U.S. federal securities laws or Canadian securities laws, we do not assume a duty to update these forward-looking statements, whether as a result of new information, subsequent events or circumstances, change in expectations or otherwise.

RESTAURANT BRANDS INTERNATIONAL INC. AND SUBSIDIARIES  
Key Operating Metrics

We evaluate our restaurants and assess our business based on the following operating metrics.

System-wide sales growth refers to the percentage change in sales at all franchise and company-owned restaurants in one period from the same period in the prior year. Comparable sales refers to the percentage change in restaurant sales in one period from the same prior year period for restaurants that have been open for 13 months or longer for TH and BK and 17 months or longer for PLK. System-wide sales growth and comparable sales are measured on a constant currency basis, which means that results exclude the effect of foreign currency translation and are calculated by translating prior year results at current year monthly average exchange rates. We analyze key operating metrics on a constant currency basis as this helps identify underlying business trends, without distortion from the effects of currency movements.

System-wide sales represent sales at all franchise restaurants and company-owned restaurants. We do not record franchise sales as revenues; however, our franchise revenues include royalties based on a percentage of franchise sales.

Net restaurant growth refers to the net increase in restaurant count (openings, net of closures) over a trailing twelve month period, divided by the restaurant count at the beginning of the trailing twelve month period.

Non-GAAP Financial Measures  
(Unaudited)

Below, we define the non-GAAP financial measures, provide a reconciliation of each non-GAAP financial measure to the most directly comparable financial measure calculated in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"), and discuss the reasons why we believe this information is useful to management and may be useful to investors. These measures do not have standardized meanings under GAAP and may differ from similarly captioned measures of other companies in our industry.

Non-GAAP Measures

To supplement our condensed consolidated financial statements presented on a GAAP basis, RBI reports the following non-GAAP financial measures: EBITDA, Adjusted EBITDA, LTM Adjusted EBITDA, Adjusted Net Income, Adjusted Diluted Earnings per Share ("Adjusted Diluted EPS"), Organic revenue growth, Organic Adjusted EBITDA growth, Free Cash Flow and Net Leverage. We believe that these non-GAAP measures are useful to investors in assessing our operating performance or liquidity, as it provides them with the same tools that management uses to evaluate our performance and is responsive to questions we receive from both investors and analysts. By disclosing these non-GAAP measures, we intend to provide investors with a consistent comparison of our operating results and trends for the periods presented.

EBITDA is defined as earnings (net income or loss) before interest expense, net, (gain) loss on early extinguishment of debt, income tax (benefit) expense, and depreciation and amortization and is used by management to measure operating performance of the business. Adjusted EBITDA is defined as EBITDA excluding the non-cash impact of share-based compensation and non-cash incentive compensation expense and (income) loss from equity method investments, net of cash distributions received from equity method investments, as well as other operating expenses (income), net. Other specifically identified costs associated with non-recurring projects are also excluded from Adjusted EBITDA, including PLK transaction costs associated with the acquisition of Popeyes, corporate restructuring and tax advisory fees, and office centralization and relocation costs. Adjusted EBITDA is used by management to measure operating performance of the business, excluding these non-cash and other specifically identified items that management believes are not relevant to management's assessment of operating performance or the performance of an acquired business. Adjusted EBITDA, as defined above, also represents our measure of segment income for each of our three operating segments.

LTM Adjusted EBITDA is defined as Adjusted EBITDA for the last twelve month period to the date reported. LTM Adjusted EBITDA as of March 31, 2019 is the sum of the Adjusted EBITDA for the quarters ended March 31, 2019, December 31, 2018, September 30, 2018 and June 30, 2018, while LTM Adjusted EBITDA as of March 31, 2018 is the sum of the Adjusted EBITDA for the quarters ended March 31, 2018, December 31, 2017, September 30, 2017 and June 30, 2017. A reconciliation of Adjusted EBITDA for each of those quarters were included in our press release attached as Exhibit 99 to our Form 8-Ks filed with the SEC on February 11, 2019, October 23, 2018, August 1, 2018, and April 24, 2018.

Adjusted Net Income is defined as net income excluding (i) franchise agreement amortization, which is a non-cash expense arising as a result of acquisition accounting that may hinder the comparability of our operating results to our industry peers, (ii) amortization of deferred financing costs and debt issuance discount, a non-cash component of interest expense, and (gains) losses on early extinguishment of debt, which are non-cash charges that vary by the timing, terms and size of debt financing transactions, (iii) (income) loss from equity method investments, net of cash distributions received from equity method investments, (iv) other operating expenses (income), net, and (v) other specifically identified costs associated with non-recurring projects.

Adjusted Diluted EPS is calculated by dividing Adjusted Net Income by the number of diluted shares of RBI during the reporting period. Adjusted Net Income and Adjusted Diluted EPS are used by management to evaluate the operating performance of the business, excluding certain non-cash and other specifically identified items that management believes are not relevant to management's assessment of operating performance or the performance of an acquired business.

Net Leverage is defined as net debt (total debt less cash and cash equivalents) divided by Adjusted EBITDA. Net Leverage is a performance measure that we believe provides investors a more complete understanding of our leverage position and borrowing capacity after factoring in cash and cash equivalents that eventually could be used to repay outstanding debt.

Revenue growth and Adjusted EBITDA growth, on an organic basis, are non-GAAP measures that exclude the impact of FX movements. Management believes that organic growth is an important metric for measuring the operating performance of our business as it helps identify underlying business trends, without distortion from the effects of FX movements. We calculate the impact of FX movements by translating prior year results at current year monthly average exchange rates. Additionally, for comparability purposes, we are calculating organic growth under Previous Standards for both periods presented.

Free Cash Flow is the total of Cash Flow for Operations minus Payments for Property and Equipment. Free Cash Flow is a liquidity measure used by management as one factor in determining the amount of cash that is available for working capital needs or other uses of cash, however, it does not represent residual cash flows available for discretionary expenditures. Commencing in the first quarter of 2019, we changed our calculation of Free Cash Flow to be defined as Cash Flow for Operations minus Payments for Property and Equipment, as management believes that the other components of Cash Flow from Investing that were previously included in the definition (such as restaurant closures/refranchisings and settlement of derivatives) are not core to the business and are subject to significant quarterly fluctuations.

Footnotes to Reconciliation Tables

- (1) Represents share-based compensation expense associated with equity awards for the periods indicated; also includes the portion of annual non-cash incentive compensation expense that eligible employees elected to receive or are expected to elect to receive as common equity in lieu of their 2018 and 2019 cash bonus, respectively.
- (2) In connection with the acquisition of Popeyes Louisiana Kitchen, Inc., we incurred certain non-recurring selling, general and administrative expenses primarily consisting of professional fees and compensation related expenses.
- (3) Costs arising primarily from professional advisory and consulting services associated with corporate restructuring initiatives related to the interpretation and implementation of the Tax Cuts and Jobs Act, which was enacted on December 22, 2017, including Treasury regulations proposed in late 2018.
- (4) In connection with the centralization and relocation of our Canadian and U.S. restaurant support centers to new offices in Toronto, Ontario, and Miami, Florida, respectively, we incurred certain non-operational expenses consisting primarily of duplicate rent expense, moving costs, and relocation-driven compensation expenses.
- (5) Represents (i) (income) loss from equity method investments and (ii) cash distributions received from our equity method investments. Cash distributions received from our equity method investments is included in segment income.
- (6) Our effective tax rate was reduced by 4.1% and 22.7% for the three months ended March 31, 2019 and 2018, respectively, and our adjusted effective tax rate was reduced by 3.9% and 20.3% for the three months ended March 31, 2019 and 2018, respectively, as a result of benefits from stock option exercises.
- (7) Represents non-cash interest expense related to losses reclassified from accumulated other comprehensive income (loss) into interest expense in connection with interest rate swaps settled in May 2015.
- (8) Adjusted income tax expense includes the tax impact of the non-GAAP adjustments and is calculated using our statutory tax rate in the jurisdiction in which the costs were incurred.
