Restaurant Brands International Inc. Reports Second Quarter 2019 Results
*RBI announces system-wide sales growth of nearly 8% and surpasses 26,000 restaurants globally
BURGER KING® and POPEYES® deliver strong growth in global comparable sales and restaurant expansion
New partnerships announced to launch POPEYES® in China and Spain and TIM HORTONS® in Thailand*

Toronto, Ontario – August 2, 2019 – Restaurant Brands International Inc. (TSX/NYSE: QSR, TSX: QSP) today reported financial results for the second quarter ended June 30, 2019.

Jose Cil, Chief Executive Officer of Restaurant Brands International Inc. ("RBI") commented, "During the second quarter, we grew global system-wide sales nearly 8% and crossed two restaurant milestones with more than 26,000 restaurants globally, including more than 18,000 Burger King restaurants."

"We are excited by the tremendous opportunity for restaurant growth in front of us, most recently highlighted by new partnerships we announced for Popeyes in China and Spain, and Tim Hortons in Thailand," continued Cil. "We are working closely with our restaurant owners to deliver an enhanced guest experience including technology like delivery, kiosks and outdoor digital menu boards. We also continue to attract leading talent in the industry to join our company and to contribute to our aspiration to build the most loved restaurant brands in the world."

(1) TH Adjusted EBITDA, BK Adjusted EBITDA and PLK Adjusted EBITDA are our measures of segment profitability.

(2) Adjusted EBITDA, Adjusted Net Income, and Adjusted Diluted Earnings per Share, LTM Free Cash Flow, and Net Leverage are non-GAAP financial measures. Please refer to "Non-GAAP Financial Measures" for further detail.

Effective January 1, 2019, we adopted the new lease accounting standard ("New Standard"). Our consolidated financial statements for 2019 reflect the application of the New Standard, while our consolidated financial statements for 2018 were prepared under the guidance of the previously applicable lease accounting standard ("Previous Standard").

The year-over-year change in Total Revenues on a GAAP basis was primarily driven by system-wide sales growth, the impact of the New Standard on franchise and property revenues and an increase in supply chain sales, partially offset by FX movements.

The decrease in Net Income Attributable to Common Shareholders and Noncontrolling Interests for the second quarter was primarily driven by an increase in income tax expense provision resulting from an adjustment related to a prior restructuring transaction that is not applicable to ongoing operations and unfavorable results from other operating expenses (income), net driven by FX movements.

The year-over year change in Adjusted EBITDA on an organic basis was primarily driven by system-wide sales growth.

Forward-Looking Statements

This press release contains certain forward-looking statements and information, which reflect management's current beliefs and expectations regarding future events and operating performance and speak only as of the date hereof. These forward-looking statements are not guarantees of future performance and involve a number of risks and uncertainties. These forward-looking statements include statements about our expectations regarding our restaurant growth opportunities in various markets and implementation of new technology. The factors that could cause actual results to differ materially from RBI's expectations are detailed in filings of RBI with the Securities and Exchange Commission and applicable Canadian securities regulatory authorities, such as its annual and quarterly reports and current reports on Form 8-K, and include the following: risks related to RBI's ability to successfully implement its domestic and international growth strategy and risks related to its international operations; risks related to RBI's ability to compete domestically and internationally in an intensely competitive industry; risks related to technology; and changes in applicable tax laws or interpretations thereof. Other than as required under U.S. federal securities laws or Canadian securities laws, we do not assume a duty to update these forward-looking statements, whether as a result of new information, subsequent events or circumstances, change in expectations or otherwise.

Key Operating Metrics

We evaluate our restaurants and assess our business based on the following operating metrics.

System-wide sales growth refers to the percentage change in sales at all franchise and company-owned restaurants in one period from the same period in the prior year. Comparable sales refers to the percentage change in restaurant sales in one period from the same prior year period for restaurants that have been open for 13 months or longer for TH and BK and 17 months or longer for PLK. System-wide sales growth and comparable sales are measured on a constant currency basis, which means that results exclude the effect of foreign currency translation and are calculated by translating prior year results at current year monthly average exchange rates. We analyze key operating metrics on a constant currency basis as this helps identify underlying business trends, without distortion from the effects of currency movements.

System-wide sales represent sales at all franchise restaurants and company-owned restaurants. We do not record franchise sales as revenues; however, our franchise revenues include royalties based on a percentage of franchise sales.

Net restaurant growth refers to the net increase in restaurant count (openings, net of closures) over a trailing twelve month period, divided by the restaurant count at the beginning of the trailing twelve month period.

Non-GAAP Financial Measures
(Unaudited)

Below, we define the non-GAAP financial measures, provide a reconciliation of each non-GAAP financial measure to the most directly comparable financial measure calculated in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"), and discuss the reasons why we believe this information is useful to management and may be useful to investors. These measures do not have standardized meanings under GAAP and may differ from similarly captioned measures of other companies in our industry.

Non-GAAP Measures

To supplement our condensed consolidated financial statements presented on a GAAP basis, RBI reports the following non-GAAP financial measures: EBITDA, Adjusted EBITDA, LTM Adjusted EBITDA, Adjusted Net Income, Adjusted Diluted Earnings per Share ("Adjusted Diluted EPS"), Organic revenue growth, Organic Adjusted EBITDA growth, Free Cash Flow and Net Leverage. We believe that these non-GAAP measures are useful to investors in assessing our operating performance or liquidity, as it provides them with the same tools that management uses to evaluate our performance and is responsive to questions we receive from both investors and analysts. By disclosing these non-GAAP measures, we intend to provide investors with a consistent comparison of our operating results and trends for the periods presented.

EBITDA is defined as earnings (net income or loss) before interest expense, net, (gain) loss on early extinguishment of debt, income tax (benefit) expense, and depreciation and amortization and is used by management to measure operating performance of the business. Adjusted EBITDA is defined as EBITDA excluding the non-cash impact of share-based compensation and non-cash incentive compensation expense and (income) loss from equity method investments, net of cash distributions received from equity method investments, as well as other operating expenses (income), net. Other specifically identified costs associated with non-recurring projects are also excluded from Adjusted EBITDA, including PLK transaction costs associated with the acquisition of Popeyes, corporate restructuring and tax advisory fees, and office centralization and relocation costs. Adjusted EBITDA is used by management to measure operating performance of the business, excluding these non-cash and other specifically identified items that management believes are not relevant to management's assessment of operating performance or the performance of an acquired business. Adjusted EBITDA, as defined above, also represents our measure of segment income for each of our three operating segments.

LTM Adjusted EBITDA is defined as Adjusted EBITDA for the last twelve month period to the date reported. LTM Adjusted EBITDA as of June 30, 2019 is the sum of the Adjusted EBITDA for the quarters ended June 30, 2019, March 31, 2019, December 31, 2018 and September 30, 2018, while LTM Adjusted EBITDA as of June 30, 2018 is the sum of the Adjusted EBITDA for the quarters ended June 30, 2018, March 31, 2018, December 31, 2017 and September 30, 2017. A reconciliation of Adjusted EBITDA for each of those quarters were included in our press release attached as Exhibit 99 to our Form 8-Ks filed with the SEC on April 29, 2019, February 11, 2019, October 23, 2018 and August 1, 2018.

Adjusted Net Income is defined as net income excluding (i) franchise agreement amortization, which is a non-cash expense arising as a result of acquisition accounting that may hinder the comparability of our operating results to our industry peers, (ii) amortization of deferred financing costs and debt issuance discount, a non-cash component of interest expense, and interest expense and (gains) losses on early extinguishment of debt, which represents non-cash interest expense related to losses reclassified from accumulated comprehensive income (loss) into interest expense in connection with interest rate swaps settled in May 2015 and non-cash charges that vary by the timing, terms and size of debt financing transactions, (iii) (income) loss from equity method investments, net of cash distributions received from equity method investments, (iv) other operating expenses (income), net, and (v) other specifically identified costs associated with non-recurring projects.

Adjusted Diluted EPS is calculated by dividing Adjusted Net Income by the number of diluted shares of RBI during the reporting period. Adjusted Net Income and Adjusted Diluted EPS are used by management to evaluate the operating performance of the business, excluding certain non-cash and other specifically identified items that management believes are not relevant to management's assessment of operating performance or the performance of an acquired business.

Net Leverage is defined as net debt (total debt less cash and cash equivalents) divided by Adjusted EBITDA. Net Leverage is a performance measure that we believe provides investors a more complete understanding of our leverage position and borrowing capacity after factoring in cash and cash equivalents that eventually could be used to repay outstanding debt.

Revenue growth and Adjusted EBITDA growth, on an organic basis, are non-GAAP measures that exclude the impact of FX movements. Management believes that organic growth is an important metric for measuring the operating performance of our business as it helps identify underlying business trends, without distortion from the effects of FX movements. We calculate the impact of FX movements by translating prior year results at current year monthly average exchange rates. Additionally, for comparability purposes, we are calculating organic growth under Previous Standard for both periods presented.

Free Cash Flow is the total of Net cash provided by (used for) operating activities minus Payments for property and equipment. Free Cash Flow is a liquidity measure used by management as one factor in determining the amount of cash that is available for working capital needs or other uses of cash, however, it does not represent residual cash flows available for discretionary expenditures. Commencing in the first quarter of 2019, we changed our calculation of Free Cash Flow to be defined as Net cash provided by (used for) operating activities minus Payments for property and equipment, as management believes that the other components of Net cash provided by (used for) investing activities that were previously included in the definition (such as restaurant closures/refranchisings and settlement of derivatives) are not core to the business and are subject to significant quarterly fluctuations.

Footnotes to Reconciliation Tables

- (1) Represents share-based compensation expense associated with equity awards for the periods indicated; also includes the portion of annual non-cash incentive compensation expense that eligible employees elected to receive or are expected to elect to receive as common equity in lieu of their 2018 and 2019 cash bonus, respectively.
- (2) In connection with the acquisition of Popeyes Louisiana Kitchen, Inc., we incurred certain non-recurring selling, general and administrative expenses primarily consisting of professional fees and compensation related expenses.
- (3) Costs arising primarily from professional advisory and consulting services associated with corporate restructuring initiatives related to the interpretation and implementation of the Tax Cuts and Jobs Act, which was enacted on December 22, 2017, including Treasury regulations proposed in late 2018.
- (4) In connection with the centralization and relocation of our Canadian and U.S. restaurant support centers to new offices in Toronto, Ontario, and Miami, Florida, respectively, we incurred certain non-operational expenses consisting primarily of duplicate rent expense, moving costs, and relocation-driven compensation expenses.
- (5) Represents (i) (income) loss from equity method investments and (ii) cash distributions received from our equity method investments. Cash distributions received from our equity method investments is included in segment income.
- (6) The effective tax rate for the three and six months ended June 30, 2019 reflects a \$37 million income tax expense provision adjustment related to a prior restructuring transaction not applicable to ongoing operations which increased our effective tax rate by 10.4% and 5.6% during the three and six months ended June 30, 2019, respectively. Adjusted income tax expense excludes the impact of this adjustment.
- (7) The effective tax rate was reduced by 4.0% and 0.6% for the three months ended June 30, 2019 and 2018, respectively, and our adjusted effective tax rate was reduced by 3.6% and 0.6% for the three months ended June 30, 2019 and 2018, respectively, as a result of benefits from stock option exercises. Our effective tax rate was reduced by 4.1% and 10.1% for the six months ended June 30, 2019 and 2018, respectively, and our adjusted effective tax rate was reduced by 3.8% and 9.4% for the six months ended June 30, 2019 and 2018, respectively, as a result of benefits from stock option exercises.
- (8) Represents non-cash interest expense related to losses reclassified from accumulated other comprehensive income (loss) into interest expense in connection with interest rate swaps settled in May 2015.
- (9) Adjusted income tax expense includes the tax impact of the non-GAAP adjustments and is calculated using our statutory tax rate in the jurisdiction in which the costs were incurred.
